

Inogen One® G3
 Made In USA

The Inogen One®G3 System	
Weight	2.3 kgs (include double battery)
Size	Length: 22.22 cm Width: 7.5 cm Height: 23.5 cm
Oxygen Flow	Pulse dose delivery system Five flow settings 1, 2, 3, 4, 5
Power	AC Power Supply 100-240V, 50-60Hz (auto sensing to allow worldwide use) DC Power Cable: for use and re-charging in car
Battery	Duration (16-cell, double battery): Up to 9 hours Recharge approximately 8 hours with AC or DC power (Optional 8-cell, single battery available)
Warranty	3 years limited warranty on compressor
Noise Level	42 DbA

- Designed for 24/7 use
- Simple control functions and easy-to-read LCD display
- Breath Detection Alert Mode. After 60 seconds, the device will shift into auto pulse mode when no breath is detected; ensuring a constant delivery of oxygen to patients

326 Bollay Drive, Coleta, California 93117, USA

Features and Benefits

• Regain Independence

The Inogen One is made to follow you anywhere whether it's around town, on the road, on the cruise or in the air. Where you go is now up to you.

At typical cruising altitude of 36,000-40,000 feet (outside), air pressure in the cabin is maintained at 6,000-8,000 feet. Inogen One is approved for use at a maximum of 10,000 feet (air pressure in the cabin)

• Multiple Power Sources for oxygen supply anytime, anywhere

Inogen's multiple power sources enables you to travel and go wherever you want.

1. AC Power Supply 100-240V, 50-60Hz
(auto sensing to allow worldwide use)
2. DC Power Cable : for mobile use in car
3. Double cell rechargeable lithium ion battery (single cell available)
Inogen One G3: Up to 9 hours @ setting 1
Inogen One G2: Up to 10 hours @ setting 1

• Lightweight

Inogen One is made portable with the help of a cart and carry bag. It's light enough to carry over the shoulder.

• Small

Compact enough to hold in your hand. Sits discreetly at your feet, behind a chair, next to the bed, or over your shoulder.

• Ultra Quiet Operation

One of the most quiet oxygen devices available in the market. It's very quiet that most people won't know it is running.

• Surprising Energy Efficiency

The Inogen One use about as much power as 40-watts lights bulb.

• Ease of Use

The Inogen One is easy to use, making it easier to comply with your doctor's directives, which leads to better health, greater independence and less stress to you.

Inogen One Unique Intelligent Delivery Technology

- The only portable oxygen concentrator proven to oxygenate patients during rest, exertion and sleep.
- Highly flexible to changing environments and self-adjust to promote increased oxygen delivery during sleep for most patients.
- Increases each bolus dose volume as breathing rate slows.
- Detects even shallow breaths at night and triggers a bolus dose based on a fixed minute volume.

oxygen • anytime • anywhere
