„ANTI-HAFT“ Bipolare Pinzetten

Da unsere bipolaren Pinzetten mit einer soliden Silberspitze versehen sind, verteilt sich die Koagulationshitze optimal. Das heißt dass die Spitze sich sehr langsam erwärmt und das Festkleben von Gewebe vermieden wird. Da unsere Spitzen nicht mit einer Silberschicht versehen sondern aus solidem Sterlingsilber gefertigt sind, bleibt dieser Anti-Hafteffekt dauerhaft erhalten.

Die zusätzliche Vergoldung bietet folgende zusätzlichen Vorteile:

- Die Silberspitze läuft, auch nach längerer Lagerzeit, nicht an.
- Bakterien können sich, durch den antibakteriellen Effekt, kaum festsetzen.
- Die Pinzette ist säure- und laugenbeständig.
- Die Leitfähigkeit ist verbessert.

„NON-STICK“ Bipolar Forceps

Manufactured with a solid silvertip, our Bipolar-forceps dissipate the emerging heat during coagulation optimally. So the tip gets heated very slowly and adherence of tissue is avoided. As our tips aren't coated with a silver alloy, but made of solid sterling silver, the NON-STICK-effect will last forever.

The additional gold plating offers the following additional advantages:

- It avoids the tarnishing of the silver-tip, also after a long-time of stock-keeping.
- It largely prevents bacteria to find a hold due to its antibacterial effect.
- It is resistant to acids and alkaline solutions
- It offers a better conductivity

„ANTI-ADHERENTE“ pinzas bipolares

Fabricado con una punta de plata sólida, nuestras pinzas bipolares disipan el calor que se produce durante la coagulación de manera óptima. Así la punta se calienta muy lentamente y se evita la adherencia del tejido.

Como nuestras puntas no estan recubiertas con una aleación de plata, pero hechas de plata esterlina sólida, el efecto ANTI-ADHERENTE durará para siempre.

El bañado adicional en oro ofrece las siguientes ventajas:

- Evita la pérdida de brillo de la punta de plata, también después de un largo tiempo de mantenimiento en stock.
- Evita mayormente que las bacterias encuentren un agarre debido a su efecto antibacteriano.
- Es resistente a los ácidos y las soluciones alcalinas.
- Ofrece una mejor conductividad.

„NON-STICK“ Pincas Bipolaires

Fabriqués avec une pointe en argent solide, nos pincas bipolaires optimisent la dissipation de la chaleur qui se produit pendant la coagulation. Ainsi la pointe s'échauffe très lentement et l'agglutination de tissu est évitée.

Nos pointes étant fait d'argent Sterling solide et ne pas seulement ayant une couche d'argent, cet effet restera.

Le plaqué or supplémentaire offre les autres avantages suivants :

- Il prévient the ternissement de la pointe en argent, même pendant une longue durée de stockage.
- Il prévient largement l'incrustation de bactéries, du à son effet antibacterien.
- Il est résistant aux acides et lessives.
- Il montre une meilleure conductibilité.
